# Atlantic City

---

THIS is one of the most delightful spots on earth, having an ideal climate almost throughout the year. Here one may enjoy great benefit for one's health and happiness. It is celebrated as a Health Resort, and there is no place known to exceed it in the large diversity of amusements. Probably the most pleasure is derived from the bathing, as Atlantic City's bathing beach is the finest in the world.

The population is about 50,000, with a floating population in summer of over 200,000. The famous boardwalk (or Esplanade) is seven miles long, sixty feet wide in the central part, and forty feet wide in the other portion.
